Hurricane Exercise Debris Model

Landfall Expected In About 4 Hours

**For Official
Use Only!**

Post Landfall Debris Model Results

North Carolina - 823,000 Yards

*Model results per county on
following page*

This model is based on a
Category 3 storm making landfall
near Cape Hatteras, NC.

Debris

- < 100,000 cubic yards
- 100,000 - 249,999 cubic yards
- 250,000 - 499,999 cubic yards
- 500,000 - 999,999 cubic yards
- >1,000,000 cubic yards

Information provided on this page displays a Category 3 storm making landfall near Cape Hatteras, NC. These projections are based on information from the NHC (1500 EDT 06/06/2007) forecast. The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds.

Details about this model may be obtained at <https://englink.usace.army.mil>

Hurricane Exercise Population Model

Landfall Expected In About 4 Hours

**For Official
Use Only!**

Post Landfall Population Model Results

North Carolina - 55,000

*Model results per county on
following page*

This model is based on a
Category 3 storm making landfall
near Cape Hatteras, NC.

Population

- < 25,000 persons
- 25,000 - 99,999 persons
- 100,000 - 174,999 persons
- 175,000 - 249,999 persons
- > 250,000 persons

Information provided on this page displays a Category 3 storm making landfall near Cape Hatteras, NC. These projections are based on information from the NHC (1500 EDT 06/06/2007) forecast. The numbers of persons included in this model output are those that would be included within estimated hurricane force winds (Census 2000 values adjusted to July 2005 values).

Post Landfall Ice/Water Model Results

Day One / Day Two / Day Three
NC – 2/4/8 Truckloads Each

*Model results per county on
following page*

This model is based on a
Category 3 storm making landfall
near Cape Hatteras, NC.

Commodities

- < 5 Trucks Each
- 5 - 10 Trucks Each
- 11 - 20 Trucks Each
- 21 - 40 Trucks Each
- > 40 Trucks Each

Information provided on this page displays a Category 3 storm making landfall near Cape Hatteras, NC. These projections are based on information from the NHC (1500 EDT 06/06/2007) forecast. The amount of commodities forecasted is based on Mission Guide Book requirements (8 pounds of ice per person per day) and SME input. The graphic represents single day needs with full distribution system in place and operating.

Landfall Expected In About 4 Hours

**For Official
Use Only!**

[illegible]

The amount of commodities forecasted is based on Mission Guide Book requirements (8 pounds of ice per person per day) and SME input and the above table indicates suggested needs based on phased deployment of a commodities distribution system. The assumption in this scenario is that 40% of the resident population affected by the hurricane will have power outage in this area and cause a need for ice and water.
